

Hanging Adapters for Truss

Heavy Duty Multipurpose Hanging Adapters

The brand-new hanging adapter (Gizmo) is designed to connect trusses via a shackle to a steel, chain, or chain hoist. This design allows you to use it with a broad range of products such as HD24, FD/HD3X, FD/HD4X, TD35 and XD. Also a separate hanging adapter is available for the ST truss. The construction consists of a solid aluminum square bar with clamps and a special 360-degree rotatable eyebolt. The clamps can be replaced to match the right position for the truss of your choice. The hanging adapter has a standard WLL of 1.500 kg. When used under the right conditions the loading capacity can be expanded.

The attractive feature is that the adapters are multi-functional and can serve multiple purposes such as:

1. Connecting the hanging adapter to the bottom of the truss that will make it a hanging point.
2. Attach the hanging adapter to the top of the truss.
3. Attach the hanging adapter to the inside of the truss.

Facts

- 360 degrees rotatable eyebolt
- Standard WLL of 1500 kg
- Solid Aluminium (anodized)
- Multi purpose (design allows use with a broad range of products)
- Can be attached on top/bottom or inside the truss
- Can be used to create an extra hanging point

With the use of slimline couplers on the hanging adapter, the adapter can also be placed on the receivers between the truss pins, you can also create an extra hanging point by using this product.
